## KIIT POLYTECHNIC, BHUBANESWAR LESSON PLAN

## Session (2022-2023)

| Discipline Civil Engg. | Semester: $4^{\text {th }}$ sem. <br> Summer/2023 | Name of the Teaching Faculty: Suchismita Padhi(Lecturer) <br> Email ID: Suchismita.padhifce@kp.kiit.ac.in |
| :---: | :---: | :---: |
| Subject: <br> Land <br> survey-I <br> (Th.3) | Nos of days per week class allotted: 05 | Start Date :13/02/23 End Date:23/05/23 |
| Week | Class day | Theory topics |
| 1st | $1^{\text {ST }}$ | Surveying: Definition Aims and objectives |
|  | $2^{\mathrm{ND}}$ | Principles of survey-Plane surveying-GeodeticSurveying- Instrumental surveying. |
|  | $3^{\mathrm{RD}}$ | Precision and accuracy of measurements, instrumentsused for measurement of distance, |
|  | $4^{\text {th }}$ | Types of tapes and chains. |
|  | $5^{\text {th }}$ | Errors and mistakes in linear measurement -classification, Sources of errors and remedies. |
| 2nd | $1^{\text {ST }}$ | Corrections to measured lengths due to-incorrect length,temperature variation, pull, sag, |
|  | $2^{\text {ND }}$ | numerical problem applying corrections |
|  | $3^{\text {RD }}$ | CHAINING AND CHAIN SURVEYING: Equipment and accessories for chaining |
|  | $4^{\text {TH }}$ | Ranging - Purpose, signaling, direct and indirect ranging, Line ranger features and use, error due to incorrect ranging. |
|  | $5^{\text {TH }}$ | Methods of chaining -Chaining on flat ground, Chainingon sloping ground stepping method, Clinometer-features and use, slope correction |
| 3rd | $1^{\text {ST }}$ | Setting perpendicular with chain \& tape, |

|  | $2^{\mathrm{ND}}$ | Chaining across different <br> types ofobstacles - |
| :--- | :--- | :--- |
|  | $3^{\text {rd }}$ | Numerical problems on chaining across <br> obstacles |
|  | $4^{\text {th }}$ | Purpose of chain surveying, Its Principles, <br> concept of fieldbook |
| 4 th | $5^{\text {th }}$ | Selection of survey stations, base line, <br> tie lines, Check <br> Lines |
|  | $1^{\text {sT }}$ | Offsets - Necessity, Perpendicular and <br> Oblique offsets, <br> Instruments for <br> setting offset - Cross Staff, Optical Square. |
|  | $2^{\text {ND }}$ | Errors in chain surveying - compensating <br>  |

|  |  | remedies, Precautions to be taken during chainsurveying. |
| :---: | :---: | :---: |
|  | $3^{\text {RD }}$ | ANGULAR MEASUREMENT AND COMPASSURVEYING: <br> Measurement of angles with chain, |
|  | $4^{\text {TH }}$ | Measurement of angles tape \& compass |
|  | $5^{\text {TH }}$ | Compass - Types, features, parts, merits \& demerits,testing \& adjustment of compass |
| $5^{\text {th }}$ | $1^{\text {ST }}$ | Designation of angles- concept of meridians Magnetic,True, arbitrary; Concept of bearings |
|  | $2^{\text {ND }}$ | Whole circle bearing, Quadrantal bearing, Reducedbearing, suitability of application |
|  | $3^{\text {RD }}$ | Quiz Test |
|  | $4^{\text {TH }}$ | Use of compasses - setting in field-centering, leveling,taking readings, concepts of Fore bearing, Back Bearing |
|  | $5^{\text {TH }}$ | Numerical problems on computation of interior \& exterior angles from bearings. |
| $6^{\text {th }}$ | $1^{\text {ST }}$ | Effects of earth's magnetism dip of needle |
|  | $2^{\text {ND }}$ | magnetic declination, variation in declination, numerical problems on application ofcorrection for declination. |
|  | $3^{\mathrm{RD}}$ | Errors in angle measurement with compass - sources \&remedies. |
|  | $4^{\text {TH }}$ | Principles of traversing - open \& closed traverse |

|  | $5^{\text {th }}$ | Local attraction - causes, detection, <br> errors, corrections |
| :--- | :--- | :--- |
| 7 th | $1^{\text {sT }}$ | Numerical problems <br> of application of correction due to <br> local attraction. |
|  | $2^{\mathrm{ND}}$ | Errors in compass surveying - <br> sources \& remedies |
|  | $3^{\mathrm{RD}}$ | Plotting of traverse - check of closing <br> error in closed \&open traverse, |
|  | $4^{\text {th }}$ | Bowditch's <br> correction, Gales table |
| $8^{\text {th }}$ | MAP READING CADASTRAL <br> MAPS \&NOMENCLATURE: <br> Study of direction, Scale, |  |
|  | $1^{\text {ST }}$ | Grid Reference and Grid <br> SquareStudy of Signs and <br> Symbols |
|  | $2^{\text {ND }}$ | Cadastral Map Preparation Methodology |

|  | $3^{\mathrm{RD}}$ | Positions of existing Control Points and <br> its types |
| :--- | :--- | :--- |
|  | $4^{\mathrm{TH}}$ | Adjacent Boundaries and Features, <br> Topology Creationand verification |
| 9th | $5^{\mathrm{TH}}$ | PLANE TABLE SURVEYING : <br> Objectives, principles and use of <br> plane tablesurveying |
|  | $1^{\text {ST }}$ | Instruments \& accessories used in <br> plane table surveying. |
|  | $2^{\mathrm{ND}}$ | Methods of plane table surveying |
|  | $4^{\mathrm{TH}}$ | Statements of TWO POINT and <br> THREE POINTPROBLEM. |
|  | $5^{\text {th }}$ | Errors in plane table surveying <br> and their corrections,precautions in <br> Plane table surveying |
| 10 th | $1^{\text {ST }}$ | Quiz test |
|  | $2^{\mathrm{ND}}$ | THEODOLITE SURVEYING AND <br> TRAVERSING: <br> Purpose and definition of theodolite <br> surveying |
|  | $3^{\mathrm{RD}}$ | Transit theodolite- Description of <br> features, componentparts |

|  | $4^{\text {th }}$ | Measurement of magnetic bearings, <br> deflection angle,direct angle |
| :--- | :--- | :--- |
|  | $5^{\text {th }}$ | Quiz Test |
| 11 th | $1^{\text {ST }}$ | Methods of theodolite traversing with - <br> inclined anglemethod, deflection <br> angle method, bearing method, |
|  | $2^{\text {ND }}$ | Checks for open and closed traverse. |
|  | $3^{\mathrm{RD}}$ | Traverse computation - consecutive <br> coordinates, latitudeand departure, <br> Gale's traverse table, Numerical problems <br>  <br> Bearings |
|  | $4^{\text {TH }}$ | Closing error - adjustment of angular <br> errors, adjustmentof bearings, <br> numerical problems |
| $12^{\text {th }}$ | $5^{\text {TH }}$ | Balancing of traverse - Bowditch's method |
|  | $2^{\text {ND }}$ | transit method, graphical <br> method, axis method, calculation of area <br> of closedtraverse |
|  | $3^{\text {RD }}$ | LEVELLING AND CONTOURING : <br> Definition and Purpose and types of <br> leveling-concepts of level surface, |
|  | $4^{\text {TH }}$ | Horizontal surface, vertical surface, <br> datum, R. L., B.M |
|  | $5^{\text {TH }}$ | Instruments used for leveling, <br> concepts of line ofcollimation, axis <br> of bubble <br> tube, axis of telescope, Vertical axis. |
|  |  | Levelling staff - Temporary <br> adjustments of level, taking |

|  |  | reading with level,concept of bench <br> mark, BS, IS, FS, CP, HI |
| :--- | :--- | :--- |
| 13 th | $1^{\text {ST }}$ | height of collimation method and Rise <br> and fall method, comparison, Numerical <br> problems on reduction oflevels applying <br> both methods, Arithmetic checks. |
|  | $2^{\mathrm{ND}}$ | Effects of curvature and refraction <br> numerical problems onapplication of <br> correction. |
|  | $3^{\mathrm{RD}}$ | Reciprocal levelling |
|  | $4^{\text {th }}$ | Errors in leveling and precautions, <br> Permanent andtemporary adjustments of <br> different types of levels. |
| 14th | $5^{\text {th }}$ | Quiz test |
|  | $1^{\text {ST }}$ | Definitions, concepts and <br> characteristics of contours |
|  | $2^{\mathrm{ND}}$ | Methods of contouring, plotting contour <br> maps,Interpretation of contour maps, |

|  | $3^{\mathrm{RD}}$ | Use of contour maps on civil <br> engineering projects |
| :--- | :--- | :--- |
|  | $4^{\mathrm{TH}}$ | Map Interpretation: Interpret <br> Human and EconomicActivities (i.e.: <br> Settlement, Communication, Land use etc |
|  | $5^{\mathrm{TH}}$ | Interpret Physical landform (i.e.: <br> Relief, Drainage Pattern etc.), <br> Problem Solving andDecision Making |
| 15 th | $1^{\text {ST }}$ | COMPUTATION OF AREA \& VOLUME: <br> Determination of areas, computation <br> of areas fromplans. |
|  | $2^{\mathrm{ND}}$ | Calculation of area by using ordinate <br> rule, trapezoidalrule, Simpson's rule. |
|  | $3^{\mathrm{RD}}$ | Calculation of volumes by prismoidal <br> formula andtrapezoidal formula |
|  | $4^{\mathrm{TH}}$ | Revision |
|  | $5^{\mathrm{TH}}$ | Revision |
